## Personal statement

---

I am a reliable and organized individual who recently graduated from the University of West London, School of Computing and Engineering with a First Class Honours Bachelor of Science. My passion lies in design, new technologies, and utilizing my skills to positively impact others. Throughout my academic journey, I have consistently sought opportunities to expand my knowledge and stay up-to-date with the latest advancements in my field.

In addition to my academic pursuits, I have gained valuable work experience that has further developed my skills. I had the opportunity to complete work placements at Pets at Home, where I refined my abilities in a professional environment. Additionally, I worked as a kitchen porter in two busy London restaurants, which instilled in me a strong work ethic and the ability to thrive in collaborative settings. These experiences honed my technical expertise and enhanced my communication and teamwork skills.

Now, as I transition into full-time work, I am eager to secure full-time employment that will allow me to continue growing in the areas of technology, design, and human interaction. I possess a natural talent for seamlessly blending these elements and am driven to contribute to innovative projects that improve user experiences.

## Key Skills

---

- HTML
- JavaScript
- Unreal Engine 4
- Microsoft Systems
- Taking responsibility
- Punctual
- Working under pressure
- Time management
- Follows instructions
- CSS
